Using the paste-the-wall technique

Use nonwoven adhesive (e.g. Metylan Secura 1:10 = 500 g in 5 l water) or a comparable product. Apply the adhesive evenly to the base surface and place the cut lengths dry into the bed of adhesive. Please read the adhesive manufacturer's instructions for use.

Using a pasting machine

ERFURT-Vliesfaser Trend wallpapers can also be pasted using a pasting machine, folded together and applied without soaking. Use nonwoven adhesive (e.g. Metylan Secura 1:10 = 500 g in 5 l water) or a comparable product. Please read the adhesive manufacturer's instructions for use.

Wallpapering

Hang ERFURT-Vliesfaser Trend perpendicular, with the lengths butt jointed to each other. Press the widths free of bubbles using a rubber roller or a wallpapering palette knife. Press excess lengths at ceilings, skirting boards, windows etc. into the corner with a straight edge and trim with a Stanley knife. Ensure that the wallcovering does not overlap. Immediately remove any traces of adhesive from the surface.

Painting

After drying, ERFURT-Vliesfaser Trend should be painted or coated. Paints, glaze or high-grade emulsion paints are suitable for this. Two coats of paint are required to achieve gloss surfaces.
